

Biological Assay Package

OVERVIEW

Abstract

The Biological Assay Package for the PLA 3.0.4 platform organizes data, processes, and results into documents.

The Biological Assay Package provides various document types that broadly correspond to the following three functional areas:

- Assay documents
- Advanced calculations
- Supporting documents

Each document type is designed to support you in the completion of a specific task, such as a statistical calculation or the documentation of an assay.

Supported assay document types:

- Quantitative response assay
- Dichotomous assay

Supported advanced calculation document types:

- Combination of assay results
- Equivalence margin development

Supported supporting document types:

- Basic bioassay protocol
- Control chart
- Test system definition

TECHNICAL SPECIFICATION

Type

Document Package

System Requirements

- PLA 3.0.4

Supported File Formats

- n/a

Version

26 SR1 (Build 1043)

Supported Systems

- n/a

Supported Languages

English, German

DELIVERY AND SUPPORT

Release Date

2019/05/17

Scope of Delivery

- Software (download)
- User manual (PDF)

Support and Upgrades

You have access to our PLA support platform at: support.bioassay.de

Lifecycle

We will provide support for PLA 3.0 and all related modules until March 15, 2024.

This module is covered by our PLA Support Contract. The first year is included and the contract can be renewed year by year. To find out more about its benefits, please go to: www.bioassay.de/support-contract
