Dear Max,

As a PLA 3.0 user, you know that we offer a broad variety of functions integrated in our basic PLA 3.0 installation kit and that you can extend the functionality with add-ons.

One add-on group are our Data Acquisition Modules that populate the data tables of a document directly with data from external systems like plate readers. A plate reader provides a stream of measurement values that need to be imported into the data table of a specific document. Of course, this all happens in a GLP/GMP compliant way.
