What others said about the training

"Very helpful training for explaining how to utilize all of the capabilities of PLA 3.0. Small classroom setting allowed for personalized instruction."
Corinne Clifford

"The training was very interactive, the discussions and Ralf's presentations were very helpful for us to learn the power of PLA3.0 as well as to clarify some misunderstandings about the system and sample suitability assessments. I believe this was very helpful for scientists who don't have extensive training on statistics to understand better how to use PLA3.0 for their relative potency data processing. Thanks again for a very useful training session."
Jin Y., Genocea Biosciences

"The Super User training provided a thorough overview of the new system in an easy to understand manner. Dr. Stegmann tailored the training to audience requirements, making it relevant, interesting and worthwhile. I will be able to use this knowledge to fully optimize how we use the software. This will be very beneficial for our laboratory. Thank you!"
Katherine Niedzwiecki
