(build 1015) | Dez 2018

PLA 3.0.4 SR6 (build 762) |
Sep 2018

Dear Max,

I would like to give you more information about our training in San Francisco.

San Francisco, northern California, U.S., is located on a peninsula between the Pacific Ocean and San Francisco Bay. It is called the cultural and financial center of the western United States and is one of the country's most cosmopolitan cities. The region is well-known for its technology industry and start-ups.

You might know San Francisco for its cable cars, music, art, good food and the steep streets which offer breathtaking views at one of the world's greatest bays. April is a good time to go to San Francisco. Spring is sunny and dry because the wet season finally came to an end. The average high temperature will be around 63 F (17 C). It can go up to at least 75 F (24 C).

Your PLA training will take place at the "Hilton San Francisco Financial District" which is located in the central business district. It is home to the city's largest concentration of corporate headquarters, insurance companies, real estate and law firms, all kind of financial institutions and several consulates. All six San Francisco Fortune 500 companies are in the district. There are several restaurants and shopping malls, including the Crocker Galleria, the Embarcadero Center and the Ferry Building Marketplace. Parks and plazas located there include Sue Biermann Park, Justin Herman Plaza and Transamerica Redwood Park.

The number of participants for our training is limited to ensure a highly productive working atmosphere. The PLA 3.0 Training/Workshop is a comprehensive training about the most important features of PLA 3.0, how to use them most effectively to make your work more accurate, faster, easier and saves both your time and money.

Best regards
Mathias von Gellhorn
Marketing Manager
Stegmann Systems GmbH
