Biological Assay Package 26
SR1 (build 1043) | May
2019

Dear Max,

If you need to export your data from PLA 3.0, you can use our Integration Report Package as an export tool. With this tool, you can export and transform our PLA 3.0 documents to a specific external format. A PLA 3.0 document is a file that contains all settings like the raw data as well as the calculation results.

Our PLA 3.0 Integration Report Package enables you to export your results from the Quantitative Response Assay Documents and the Combination of Assay Results Documents into various easy-to-read file formats such as CSV, INI, XML, JSON and Excel (XML).

Are you using a Laboratory Information Management System (LIMS)? No problem, you can use the Integration Report Package to connect PLA 3.0 with it.

Of course, all our PLA products are optimized for use in a GMP environment and are fully auditable - they support your internal and external audits.

Would you also like to use the Integration Report Package in your daily work? Then please [request a quote!](#)

If you have any further questions, please contact Tanja Farrenkopf our Sales Manager via [email](#).
