[New PLA version released](#)

We are happy to inform you, that our new PLA 3.0.6 was released today.

The new PLA version provides you with major improvements regarding the management of electronic data, database navigation, customer support, and security updates.

One key feature is the Attachments editor to export plots or add external files to the electronic document. Create barcodes for documents to organize and exchange assays with a few clicks. Attach reports containing a barcode to the corresponding document for convenient data storage. In addition, view document properties to quickly access information about the document type, recent modifications, signature and calculation status, and calculated variables. New integrated feedback and support request dialogs further enable direct contact with the PLA support team.

Get more information..

Best regards
Mathias von Gellhorn
Marketing Manager
