[Features of our Dose-Response Analysis Package - EC50, Interpolation analysis & Spike-and-recovery](#)

Dear Max,

did you know that our Dose-Response Analysis Package provides a range of biostatistical methods for immunoassays, ELISA, and more. It supports you in investigating equivalence for calibration curves, provides enhanced data processing, and options for subgroup analysis.

For each method, we provide sample documents you can download when activating the Dose-Response Analysis Package* add-on**. Additional information about each sample document is provided in the document's Comment section.

Effective-concentration calculation (EC50) - read more

Interpolation analysis - read more

Spike-and-recovery analysis - read more

Advanced analysis with PLA

Curve comparisons - read more

Equivalence margin development - read more

Linearity-of-dilution assessment - read more

* in PLA 3.0.5 or higher

** [How to activate add-ons?](#)

Best regards
Mathias von Gellhorn
Marketing Manager
