### [Working with the PLA 3.0 framework and its add-ons in PLA 3.0.5 and higher versions](#)

Dear Mathias,

The PLA 3.0 framework provides the basis for your work environment and the use of add-ons. It is responsible for the integrity and reliability of measurement data and provides security features, employing user accounts, roles, and permissions. It also offers strong validation features for Installation Qualification and Operational Qualification.

As of PLA 3.0.5, add-ons allow you to easily extend your work environment with new features. Add-ons are responsible for statistical features and other functions and provide extensions such as document types, report templates, data acquisition modules, and customer-specific modules.

A wide range of add-ons is available for free. They are included in our PLA 3.0 all-in-one software bundle. In this bundle, we provide, among other things, the Biological Assay Package, the Dose-Response Analysis Package, the Microbial Assays for Antibiotics Package.

Find all available add-ons on our website ([www.bioassay.de](http://www.bioassay.de)) under PLA 3.0/Analyzing data; PLA 3.0/Acquiring data; PLA 3.0/Supporting add-ons.

#### Working with add-ons in PLA 3.0.5 and higher versions

Employ the 'Add-on management' feature to manage your add-ons from within PLA 3.0. Activate the add-ons you want to use and add sample documents and templates. Request trial versions or quotes for add-ons not yet included in your license or deactivate add-ons you no longer require. Get an overview of available upgrades and migrate to a higher add-on version with just a few clicks. For more details, please consult the Working with add-ons ([Download](#)) How-to Guide in our PLA 3.0 Help Center ([www.bioassay.de/helpcenter](http://www.bioassay.de/helpcenter)).

Best regards  
Mathias von Gellhorn  
Marketing Manager
